

Technyl® celebrates 66 years of innovation at K 2019

Lyon, France, Sept. 9, 2019 – Solvay’s leading polyamide 6.6 brand Technyl® celebrates 66 years of innovation in lightweighting, thermal management, fire protection and eco-responsible solutions at K 2019 (**Hall 6, Booth C61**). Building on historical foundations, the Technyl® brand is stronger than ever with new products and services to help the industry anticipate global trends and transform our lifestyle.

At K 2019, the Technyl® Force will unveil **HUB by Technyl®** to further accelerate customer product innovation in fast-changing markets. HUB by Technyl® features strengthened and upgraded advanced MMI® Technyl® Design¹ predictive simulation, application performance testing (APT®) and Sinterline® 3D-printing services, better connecting them to the entire Technyl® development offering. This will provide customers more capabilities and synergies for eco-design agility and cost optimization.

Increased connectivity, urban densification, new mobility: the polyamide market reference widens its offer and will launch in October at K 2019 **Technyl® Orange**, a brand-new colour-stabilized range designed to meet the safety challenges of electrical mobility, perfectly suitable for laser-marking. In addition, the **Technyl® Blue** range is being enlarged with new grades dedicated to eV and HeV cooling systems.

Also, on display at the booth will be a **revolutionary brake pedal concept** opening the way to novel opportunities in lightweighting for structural automotive applications.

® APT, Sinterline and Technyl are registered trademarks of Solvay.

¹ MMI® Technyl® Design is an advanced service powered by Digimat® from e-Xstream, an MSC Software Company.
